Comment:~~CONFIDENTIAL~~

a. The occupation by a fighter unit is known from previous reports. According to the repeatedly counted number of aircraft, one fighter regiment is probably stationed at the field. From the statement in para 4 that aircraft with in-line engines and cranked wings were also allegedly at the field it is considered possible that, besides IAS, IL-10s were also stationed there on the day of observation. It is probable that aircraft of the KOLTHEN ground attack regiment were temporarily stationed at the DESSAU airfield.

25X1C b. From the motor vehicle [REDACTED] the fighter unit cannot be identified. According to previous information, the fighter unit had been stationed in BRANDIS or KOLTHEN before its transfer to DESSAU.
